

# WE FEEL NATURE

## MECHANISED PLANTING

# THE ADVANTAGES

Verver Export has extensive experience in the application of machine planted flower bulbs in public green areas and parks. The flower bulbs are planted by experienced operators with our own machines. More experience you cannot find!

We would like to show you the advantages of mechanical planted flower bulbs at a glance:

## 1. SAFE LABOUR

We all know that planting large quantities of flower bulbs by hand is a labour-intensive job. And labour is becoming more expensive! The planting machine of Verver Export offers the solution here: 40.000 flower bulbs in half a day or 100,000 flower bulbs planted in one day.

(\* Of course this depends on the bulb size – for small bulbs you can triple the numbers!)

## 2. INVESTMENT OVER YEARS

All of our bulbs mixtures (kits for the planting machine) are carefully composed. The flowering will rehearse for years. The cost per square meter are low given the durability. We provide an estimate of how many years you can expect a mixture to flower.

## 3. LOW MAINTENANCE

Our flower bulbs plantings mean low maintenance. After the flower bulbs die down in spring you can cut them back. In fact, a long flowering mixture may help to save some mowing costs in early spring!

## 4. BIODIVERSITY

Flower bulbs increase biodiversity in the public green space. With proper assortment choice, this planting contributes as food plants for early flying butterflies, bees and bumblebees. We assure you an ocean of flowers where not only butterflies and bees benefit, but also passer-by will enjoy!

## 5. EXPERTISE

Our sales team will check the suitability of your planting location and is happy to help you to make the right choice from our ever-expanding product range. Use our knowledge and experience to make the best choice for your (public) green area!

# THE TECHNIQUE

For each application you choose, the technique is the same: the machine lifts the turf, the flower bulbs are scattered below the lifted grass. The grass and the turf are pushed again behind the machine. Simple in a way... But the adjustment of the machine comes very close. The setting determines how many flower bulbs you can plant per m<sup>2</sup> and how deep. And every flower bulb mixture has its own settings! The soil is obviously a key factor in the success or failure of a mechanised planting!

We show you some details of the technique that may be of importance for the planning and success of your planting projects.

## 1. PLANNING

For the planning and calculation of your planting project some facts are of importance:

- Planting location (eg tree roots, mowing policies in spring and soil type)
- Way of planting (stripes or a contiguous area)
- Radiance (natural or horticultural style)
- Choice of flower bulb mixture (note specifics given with a flower bulb kit)

## 2. MACHINE CHOICE

You can choose from three types of machines and use them for all mixtures from this catalogue.

- The 100 cm machine: plants the bulbs one meter wide. Suitable for plant jobs in verges and parks.
- The 50 cm machine: plants the bulbs 50 cm wide. Suitable for verges where the working width of the grass is narrower than a meter. Or if you want to make long runs but with less budget.
- The City Planter: plants the bulbs 50 cm wide. Suitable for locations where you like to plant post to post, bank to bank, trash bin to trash bin. This machine plants, as it were beside the tractor track, and will take the machine close to an object. Optical your plantings will continue without pause!

### 3. PREPARATION & PLANTING

For the actual planting, there are a number of action points for you:

- Mark the plant location.
- Plant locations must, if it is very dry, be watered one week prior to the planting.
- Mow the grass as short as possible.
- Provide at least one person from your own town for guiding the plant team and to deliver the flower bulbs at the site. These are pre-delivered to you.
- The machine will, in good conditions, put the turf back securely. In more difficult conditions (strong root growth, excessive rain) it may be that you have some extra work to repair the turf.

### 4. MOWING AND FERTILISING

In the spring after the flowering season there are two management points of action.

- Inform your mowing team that they may only cut the grass when the leaves of the flower bulbs have become yellow. Only then the bulb growth stops its process under the ground for the coming season. Often this is approximately six to eight weeks after flowering.
- In the first year it is certainly not necessary to fertilise, but if you want to fertilise the plantings you do that when the flower bulbs are just emerging. This means that the additional nutrients become available during the growth of the new flower bulbs under the ground. This can be done with an organic fertiliser or a chemical fertiliser (wherein the N content is not too high).

# CROCUS

Because of its early flowering, crocuses are real spring messengers. You can plant them in stripes or in contiguous areas to create nice flower carpets just after the winter. Make sure that you let the leaves grow till the end of the season before you start mowing. It is best to plant them in a well-mowed lawn otherwise there is a risk that you can not see the short flowers.

Character of Kits  
Crocus mixture  
1.000 flower bulbs

Stripes  
yes

Contiguous area

Country style  
50 /m<sup>2</sup>

Horticulture style  
200 /m<sup>2</sup>

Flowering time  
4 till 6 weeks

Durability  
till 10 years

**11189 KIT VERVER 'LIMMEN'®**  
This mix flowers earlier than the *Crocus grandiflora*. Sometimes it flowers when snow is on the ground. Take particular notice of the height, it remains modestly sized at just 5 cm.

**11190 KIT VERVER 'NATURE'®**  
A very interesting invention! A mix of very hardy crocuses, ideal for naturalising. Very early-flowering.

**11191 KIT VERVER 'HEILOO'®**  
Surprise your fellow-citizens. If you leave your plants to mature for 6 weeks after they have flowered, you will get the same results the following year.

**11192 KIT VERVER 'OCÉANIQUE'®**  
The same concept as with the traditional 'Heiloo' mix, but in blue and white. Extremely beautiful!

**11253 KIT VERVER 'EARLY GLOW'®**  
A pretty *Crocus* mix where we have chosen a combination of yellow and white.

# CROCUS / TULIP

These crocus / tulip mixtures are especially successful when the grass is mowed in the fall, shortly before planting. Only then you will achieve an optimal blooming result in spring.

**Character of Kits**  
Mixture of 2 types with  
1.000 flower bulbs

**Stripes**  
yes

**Contiguous area**  
yes

**Country style**  
no

**Horticulture style**  
150 /m<sup>2</sup>

**Flowering time**  
6 weeks

**Durability**  
till 7 years

**11524 KIT VERVER 'LANGEOOG'®**  
This mix starts out as a white snowy carpet of croci.

**11198 KIT VERVER 'TERSCHELLING'®**  
Did you know that the crocus flowers for a very long time due to the fact that it is cold when it makes its appearance? The flowering period for this mix can easily extend to 2 months.

**11254 KIT VERVER 'SIMONSZAND'®**  
At the start of spring this mix has a marvellously refreshing brilliance about it. The red sheen on the tulip's leaves shines like a glossy lipstick. Very easy to plant by machine.

**11255 KIT VERVER 'SPIEKEROOG'®**  
A simple but cheery carpet in which the tulips flower soon after the croci. A blend in which every flower stands out among all the others.

# CROCUS / TULIP

These early flowering mixtures have the advantage that you can mow the grass in spring relatively early. These mixtures therefore are ideally suited for urban areas, where your mowing plan starts first.

**Character of Kits**  
Mixture of 2 types with  
1.000 flower bulbs

**Stripes**  
yes

**Contiguous area**  
yes

**Country style**  
no

**Horticulture style**  
150 /m<sup>2</sup>

**Flowering time**  
6 weeks

**Durability**  
till 7 years

**11525 KIT VERVER 'NORDERNEY'®**  
A magnificent mix of sunny warm tones that will certainly bring spring to your town!

**11526 KIT VERVER 'WANGEROOGE'®**  
If we were to say white, red, yellow and violet, it probably wouldn't sound all that exciting at first... But such a colourful blend is just right at the start of spring.

**11527 KIT VERVER 'AMRUM'®**  
At first, the tulips are no more than a hint of colour among the croci, but they soon take on the leading role.

**11528 KIT VERVER 'SYLT'®**  
An extremely warm variant. Red and yellow form the base of the colour you can bring to your green spaces in February and March with the aid of our planting machine.

# 'PRIMA VENISE DES ALPES'©

Put on early bloomers! The flowers of particularly early flowering crocus and daffodils awaken, if nature still keeps hibernation. Bring your city in mid-winter to bloom. Would you like to create a similar mixture to your taste? Ask us!

Character of Kits  
Mixture of 2 types with

Flowering time  
6 weeks

Durability  
till 7 years

11182

## 11182 KIT 'PRIMA VENISE DES ALPES'©

An early creation of extremely precocious croci and narcissi. We would like to pay tribute to the Town of Annecy (FR), which has perfectly showcased this mix in its Parc du Paquier. Bravo! The blue and white croci are the first to arrive, followed by the narcissi.

# 'PRIMA KEMNATHER FRÜHLING'©

The true spring feeling! One surprise follows another and brings colour just at the moment that the inhabitants really need it. Especially suitable for green spaces in the city center and suburbs.

Character of Kits  
Mixture of 4 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

no

Horticulture style  
200 /m<sup>2</sup>

Flowering time  
6 weeks

Durability  
till 7 years

## 11320 KIT 'PRIMA KEMNATHER FRÜHLING'©

This mixture goes from cream-yellow slowly to yellow to orange and then red and white accents. A hue that stands out for his succession and experienced as almost if it were a different shade. Wind and rain resistant!

# 'PRIMA FRANCIA'©

More suitable for more wilder plant locations. Floriferous but with natural flair.  
A spring meadow that will greatly appeal to most people.

Character of Kits  
Mixture of 5 types with  
1.000 flower bulbs

Stripes  
no

Contiguous area  
yes

Country style  
75 /m<sup>2</sup>

Horticulture style  
200 /m<sup>2</sup>

Flowering time  
8 weeks

Durability  
till 7 years

11395

## 11395 KIT 'PRIMA FRANCIA'©

The effect of a spring meadow can be obtained by planting the same number of countryside and horticultural bulbs per square metre. For preference, plant several strips side by side in order to create a real meadow.

# 'PRIMA SOLUTION'®

Narcissi are in our opinion, always a good choice. They are ideal for naturalising and to use in mechanised plantings. Our narcissi kits have already proven themselves throughout Europe and they are very economical.

**Character of Kits**  
Mixture of 2 varieties with 1.000 flower bulbs

**Stripes**  
yes

**Contiguous area**  
yes

**Country style**  
20 /m<sup>2</sup>

**Horticulture style**  
40 /m<sup>2</sup>

**Flowering time**  
6 weeks

**Durability**  
till 5 years

## 11227 KIT 'PRIMA SOLUTION'®

Simple, effective and affordable. With a remarkable impact, these narcissi will never disappoint. They come in a wave of yellow and orange at first, before turning white with a total colour change. And above all, they make an affordable solution.

# 'PRIMA GALA'©

A beautiful natural combination of bulbs for verges that are not mowed very early in spring. Suitable for outdoor areas of the city or natural parks.

Character of Kits  
Mixture of 3 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style

Horticulture style  
200 /m<sup>2</sup>

Flowering time  
8 weeks

Durability  
till 5 years

11380

## 11380 KIT 'PRIMA GALA'©

A large number of small natural bulbs blended to make a cheerful varied mix. Spring starts early with the croci and becomes more and more spellbinding with a multitude of pretty little tulips.

# 'PRIMA PIRANA'©

For lovers of colour and surprises in public green! Because that's what kit 'Prima Pirana' brings. She gives a guaranteed number of years colour to the city!

Character of Kits  
Mixture of 3 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
30 /m<sup>2</sup>

Horticulture style  
75 /m<sup>2</sup>

Flowering time  
5 weeks

Durability  
till 4 years

## 11532 KIT 'PRIMA PIRANA'©

This mix alone contains ten different tulips, making sure there's always something new to discover in March, April and May! Other bulbs complement the tulips by providing an extra boost of shape or colour.

# 'PRIMA HELMSTEDT'©

An example of a very tight, almost designer planting of flower bulbs. A striking blend, although the colours are limited to blue and white. It is the tightness of the blue underlay with a white cloudy sky that makes this mixture controversial.

Character of Kits  
Mixture of 2 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
40 /m<sup>2</sup>

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
5 weeks

Durability  
till 5 years

11533

## 11533 KIT 'PRIMA HELMSTEDT'©

Simple? Yes, perhaps at first glance. You really only see the grape hyacinths and the narcissi, but the effect is no less spectacular. The narcissi flower continuously, making the mix very effective.

# 'PRIMA ASNIÈRES-SUR-SEINE'©

This composition of narcissi and tulips gives, no matter how planted, a cracking cheerful effect. The narcissi give the go-ahead in fresh shades after which a warm blanket is rolled out in your verges and parks.

Character of Kits  
Mixture of 2 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
30 /m<sup>2</sup>

Horticulture style  
75 /m<sup>2</sup>

Flowering time  
6 weeks

Durability  
till 5 years

## 11529 KIT 'PRIMA ASNIÈRES-SUR-SEINE'©

A blend in which tulips play the leading role. We often notice that our customers think, or are under the impression, that a plantation of flowering bulbs is not complete without tulips. Our 'Prima Asnières-sur-Seine' Kit fulfils your expectations perfectly!

# 'PRIMA VILLE DE SAINT-GENEVIÈVE-DES-BOIS'©

Warm, summery shades with a stubborn hyacinth sticking out. One of the new compositions which also makes use of Fritillaria imperialis. A new dimension in height and shape variation in our machine blends.

Character of Kits  
Mixture of 4 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
40 /m<sup>2</sup>

Horticulture style  
80 /m<sup>2</sup>

Flowering time  
5 weeks

Durability  
till 4 years

## 11507 KIT 'PRIMA VILLE DE SAINT-GENEVIÈVE-DES-BOIS'©

A composition that especially works well in slightly curved long stripes or as beautiful small flower bulb field in the middle of a green meadow in the park. With an exciting spring sun a fantastic spectacle!

# 'PRIMA VILLE DE GENÈVE'©

This new kit aims to give the best colour to your green area! Simply striking so you can't ignore in spring time...

Character of Kits  
Mixture of 3 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
50 /m<sup>2</sup>

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
5 weeks

Durability  
till 4 years

11569

## 11569 KIT 'PRIMA VILLE DE GENÈVE'©

A combination of tulips, narcissi and Fritillaria imperialis which is based on the favourites of our product range. Fresh yellow, orange and red combined with large flowers define the look of this mixture.

# 'PRIMA GENIUS LOCI'©

This exuberant narcissi - tulip mixture is particularly because of the combination of some surprising colours... Perhaps according to colour experts it is not the right combination but with much effect on the green surface of the grass.

Character of Kits  
Mixture of 2 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
30 /m<sup>2</sup>

Horticulture style  
75 /m<sup>2</sup>

Flowering time  
5 weeks

Durability  
till 4 years

11384

## 11384 KIT 'PRIMA GENIUS LOCI'©

Named after the Schloss Ippenburg in Bad Essen (DE). Several unusual cultivars combined with varieties that have proved themselves when it comes to multi-annual flowering. This mix brings an extra short-term appeal to your planting, as well as constant colour over the longer term.

# 'PRIMA HECHINGEN BLÜHT AUF'©

Although our kits full of tulips are less durable, they are still very popular. The tulip is indeed, next to the Crocus, the symbol for spring. The time of year when the days are longer and we look forward to the summer.

Character of Kits  
Mixture of 4 tulip varieties  
with 1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
no

Horticulture style  
75 /m<sup>2</sup>

Flowering time  
5 weeks

Durability  
till 4 years

## 11376 KIT 'PRIMA HECHINGEN BLÜHT AUF'©

Colourful, cheerful with little flowering time spread - so each variety has it's own moment of fame. Even if the grass in the spring grows faster then normal, tulips remain proudly sticking out above the green carpet look.

# 'PRIMA EUREKA'©

Fresh colours that are surely to be noticed along the road or in the park. Not traditionally designed with low- and early bulbs until high- and late flowering varieties. The surprise is mainly due to the variation of flowers in weeks to go!

Character of Kits  
Mixture of 3 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
50 /m<sup>2</sup>

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
5 weeks

Durability  
till 5 years

## 11566 KIT 'PRIMA EUREKA'©

Often the *Fritillaria imperialis* is showing colour in the middle of the spring flowering season. In 'Prima Eureka' it is as it were an encore to a flowering season that starts early.

# 'PRIMA LA MOTTE SERVOLEX'©

This simple but effective combination fits well in the center and in the peri-urban areas of the city.

Character of Kits  
Mixture of 2 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
40 /m<sup>2</sup>

Horticulture style  
75 /m<sup>2</sup>

Flowering time  
5 weeks

Durability  
till 4 years

11382

## 11382 KIT 'PRIMA LA MOTTE SERVOLEX'©

Two soft yellow flowers that complement each other perfectly. The orange colour of the charming little narcissus cup is picked up by the orangey-red streaks of the tulip. They flower at the same time, giving your site a particular finesse.

# 'PRIMA AMUSEMENT'©

A fantastic mixture to support events in the month of April. This carpet can not be missed, for example with gardening and landscaping exhibitions that open their doors in April.

Character of Kits  
Mixture of 2 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
30 /m<sup>2</sup>

Horticulture style  
60 /m<sup>2</sup>

Flowering time  
5 weeks

Durability  
till 4 years

## 11324 KIT 'PRIMA AMUSEMENT'©

A lovely blend of well-balanced colours including tulips that are specially highlighted by equally unusual narcissi. A parade of very original varieties!

# 'PRIMA AUXERIANA'©

An old acquaintance under the name 'Ville d'Auxerre' as a mixture in the regular autumn catalog. For many customers, this mixture we have already planted by machine. But to avoid confusion we have a new name for the 1000 bulb kit range!

Character of Kits  
Mixture of 3 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
no

Horticulture style  
75 /m<sup>2</sup>

Flowering time  
5 weeks

Durability  
till 4 years

## 11531 KIT 'PRIMA AUXERIANA'©

In early spring, you will have a set of four tulip colours: orange, yellow, white and yellow/white bicouours. Their large heads make them easy to see. I recommend you plant them against a violet or blue background, but you could also plant them against the same tones.

# 'PRIMA ILLE ET VILAINE'©

Although with machine plantings we lean toward a natural effect, we sometimes become inspired by a more horticultural style planted mixture. And why not? Everyone will be cheerful about it...

Character of Kits  
Mixture of 4 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
no

Country style  
50 /m<sup>2</sup>

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
8 weeks

Durability  
till 5 years

11260

## 11260 KIT 'PRIMA ILLE ET VILAINE'©

The white shimmer of spring sparkles here and there with a touch of red. Can be planted sparsely or densely; both options are possible. Highly recommended.

# 'PRIMA ALEGRA'©

With all the experience we have gained over years - the creative team composes kits for special circumstances. The kit 'Prima Alegra' is specially designed for moist soils.

Character of Kits  
Mixture of 3 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
40 /m<sup>2</sup>

Horticulture style  
80 /m<sup>2</sup>

Flowering time  
10 weeks

Durability  
till 8 years

## 11570 KIT 'PRIMA ALEGRA'©

A cheerful carpet of early to mid-season flowering narcissus, additionally complemented by white and blue clouds.

# 'PRIMA DONNA'©

The following two mixtures are especially appreciated because of their simplicity. Whether you obtain a rural or an artificial effect, depends on the density of planting. The effect, however, will meet your expectations.

Character of Kits  
Mixture of 3 types with  
1.000 flower bulbs

Stripes  
yes

Flowering time  
5 weeks

Durability  
till 5 years

11114

## 11114 KIT 'PRIMA DONNA'©

Contrasting shapes and colours in a single mix is perhaps daring. But when it comes to 'Prima Donna', it's a resounding success. Very reliable and cheerful.

# 'PRIMA KITISA'©

With the same thought the Kit 'Prima Donna' is composed. The mixture fits almost everywhere; in the city center, suburban areas or in natural areas.

Character of Kits  
Mixture of 3 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
50 /m<sup>2</sup>

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
5 weeks

Durability  
till 5 years

11184

## 11184 KIT 'PRIMA KITISA'©

Joyful, harmonious and bright. How successful! This mix starts with yellow tones, before turning blue and then orange and red. A high-quality floral composition.

# 'PRIMA BELLA'©

Sometimes we need just a beautiful composition of flowers and colours, for example, for an event. Kit 'Prima Bella' offers exactly what you need.

**Character of Kits**  
Mixture of 3 types with  
1.000 flower bulbs

**Stripes**  
yes

**Contiguous area**  
yes

**Country style**  
40 /m<sup>2</sup>

**Horticulture style**  
100 /m<sup>2</sup>

**Flowering time**  
5 weeks

**Durability**  
till 4 years

11199

## 11199 KIT 'PRIMA BELLA'©

A very cheerful mix with plenty of colours and shapes. Very high-performance; makes everyone happier! Highly recommended as a backdrop to events.

# 'PRIMA FLORA'©

The peri-urban areas offer the opportunity to make use of the planting machine for an extraordinary planting. You can choose between a planting with a natural effect or a more horticultural style. Early flowering varieties in country style, followed by small tulips. These compositions are really very surprising.

Character of Kits  
Mixture of 3 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
100 /m<sup>2</sup>

Horticulture style  
250 /m<sup>2</sup>

Flowering time  
8 weeks

Durability  
till 5 years

11258

## 11258 KIT 'PRIMA FLORA'©

A long flowering period that brings little surprises throughout. This collection is pleasant to look at and extremely successful in terms of its colour palette. Perfect for urban fringes or even town centres. Please note: plant quite densely to create a bushy effect.

# 'PRIMA GEYSIRZAUBER ANDERNACH'©

On demand of many, yet again a new blue-white combination, many city logo's are in this colour scheme. The composition has a long flowering period, the late flowering species do not survive in a colder climate.

Character of Kits  
Mixture of 7 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
100 /m<sup>2</sup>

Horticulture style  
200 /m<sup>2</sup>

Flowering time  
10 weeks

Durability  
till 5 years

11323 KIT 'PRIMA GEYSIRZAUBER ANDERNACH'©  
Use this combination in lighter soils and climates where winters are less severe.  
Seven types of joint 10 cultivars give a varied flowering image.

# 'PRIMA SPIELZEUGSTADT SONNEBERG'©

Colourful, cheerful and childlike was commissioned in compiling this flower bulb carpet. The strong contrasts in height, shape and colour; this mixture is an attraction for the passerby. So very suitable for pedestrian areas and parks.

Character of Kits  
Mixture of 7 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area

Country style  
50 /m<sup>2</sup>

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
8 weeks

Durability  
till 5 years

11530

## 11530 KIT 'PRIMA SPIELZEUGSTADT SONNEBERG'©

A magnificent staged structure in which every flower is always showcased. The early flowering of the crocus and scilla is only the first sign of the explosion to follow!

# 'PRIMA PLOUAY'©

This type of mixture is suitable for several application areas, both for the city as well as for areas with a natural character. And all with the same result: admiring glances of passersby...

Character of Kits  
Mixture of 8 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
50 /m<sup>2</sup>

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
10 weeks

Durability  
till 5 years

## 11183 KIT 'PRIMA PLOUAY'©

Elegant, natural and produces plenty of flowers. A highly successful composition, with thanks to the town of Plouay in Brittany. To complement traditional flowering areas, as well as those with more natural flowering, in which case planting should of course be less dense.

# 'PRIMA ANNECY-LE-VIEUX'©

And again our Kit 'Annecy-le-Vieux' with guaranteed success. The longevity surprised all. Do not forget that we can put together a mix just for you. You only need to ask us...

Character of Kits  
Mixture of 2 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
30 /m<sup>2</sup>

Horticulture style  
75 /m<sup>2</sup>

Flowering time  
8 weeks

Durability  
till 7 years

11142

## 11142 KIT 'PRIMA ANNECY-LE-VIEUX'©

A very pretty mix that has already been in flower for several years in Annecy-le-Vieux (FR) and in a great many other places in the meantime. A mix that develops over time beginning with narcissi, then early tulips, followed by late tulips. A safe bet and highly recommended.

# 'PRIMA VERA'©

The range of flower bulbs that are suitable for naturalising, is very large. This gives us the possibility to imagine us many different combinations for many different applications. With the Kit 'Prima Vera' we offer a collection that also acts natural and very rural at the same time. Very nice.

Character of Kits  
Mixture of 9 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
no

Horticulture style  
150 /m<sup>2</sup>

Flowering time  
8 weeks

Durability  
till 10 years

## 11113 KIT 'PRIMA VERA'©

For creating wonderfully flowering lawns in the spring. Discover more than twelve different varieties including scillas, croci and botanical tulips, etc. Very beautiful. Don't hesitate to sew a flowering lawn alongside to prolong flowering.

# 'KIT NARCISSUS'©

In the past it was mostly the narcissi that are planted with the machine. And the results are in general impressive. If you opt for one type, you do not profit optimally from our machine. The flowering then stops just after three weeks. Luckily our Narcissus kits can be very well planted using this new technique. Benefit and enjoy a long spring bloom.

Character of Kits  
Mixture of 12 varieties  
with 1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
20 /m<sup>2</sup>

Horticulture style  
40 /m<sup>2</sup>

Flowering time  
12 weeks

Durability  
12 years +++

## 17003 'KIT NARCISSUS'©

The number twelve is the key word for our 'Kit Narcissus'. This kit not only include twelve different varieties of Narcissus, they also flower for a minimum of twelve weeks. And the final selling point is that this mix of narcissi will also give you plenty of enjoyment for at least twelve years.

# 'PRIMA ZONA'©

Often it is our customers who inspire us. This is also the case with Kit 'Prima Zona'. Ideally suited for the use in parks or outside city centres and then plant them in long stripes. Or prairie, where we plant a number of stripes next to each other.

Character of Kits  
Mixture of 5 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
50 /m<sup>2</sup>

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
10 weeks

Durability  
till 10 years

11259

## 11259 KIT 'PRIMA ZONA'©

The 'Prima Zona' Kit always offers something new to discover. Its blue and white colours are somewhat understated, but it is precisely this modesty that makes it so beautiful. Flowers every year without difficulty. Be inspired by our photo!

# 'PRIMA AZZURRA'©

More suitable for natural areas or parks. It is better to plant a contiguous area than stripes.

Character of Kits  
Mixture of 6 types with  
1.000 flower bulbs

Stripes  
no

Contiguous area  
yes

Country style  
50 /m<sup>2</sup>

Horticulture style  
no

Flowering time  
10 weeks

Durability  
till 10 years

## 11143 KIT 'PRIMA AZZURRA'©

This blue mix is very beautiful. Flowering begins with small scillas and croci before finishing with Cammasias.

# 'FLORA LOVE'©

That blue, yellow and white are strong colours in nature is also reflected in our latest range of Flora Kits. To generate length of flowering season you should fall back on many bulbs in these colours.

Character of Kits  
Mixture of 6 types with  
1.000 flower bulbs

Stripes  
no

Contiguous area  
yes

Country style  
75 /m<sup>2</sup>

Horticulture style  
150 /m<sup>2</sup>

Flowering time  
12 weeks

Durability  
till 5 years

## 11318 KIT 'FLORA LOVE'©

'Flora Love' owes its name to all the different flower shapes in this mix. There are plenty of very delicate flowers with small stems that grow up just above the lawn. The Dutch irises bring this floral feast to a close.

# 'FLORA CRÉTEIL'©

For all Kits which are characterised by an extremely long flowering season we now definitively use the name 'Flora'. So who chooses 'Flora' is choosing plant locations with extensive grass management!

Character of Kits  
Mixture of 8 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
100 /m<sup>2</sup>

Horticulture style  
200 /m<sup>2</sup>

Flowering time  
12 weeks

Durability  
till 5 years

## 11315 KIT 'FLORA CRÉTEIL'©

Our 'Flora Créteil' Kit contains no fewer than twenty-three different cultivars! It's not surprising then that this mix flowers for a long time, starting with the small and most precocious bulbs and finishing with the Cammasias. A magnificent natural effect in white, blue and yellow tones.

# 'FLORA MAISON ALFORT'©

The planting machine is primarily used, cost-effective and sustainable to plant a large area in a short time. With good thinking you can also achieve dreamlike aesthetic effects.

Character of Kits  
Mixture of 7 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
no

Country style  
50 /m<sup>2</sup>

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
12 weeks

Durability  
till 5 years

## 11226 KIT 'FLORA MAISON ALFORT'©

Very special when it comes to the shapes of its flowers; this composition really does have everything. On the other hand, you will need a slightly damp and shady site. Towards the end of its flowering period, grass grows at the same time, creating a flowering lawn. Very special.

# 'FLORA CHANTILLY'©

Of sweet, small to large, fantastic! 'Flora Chantilly' is especially looking for the extremes of the season at the end of spring. The grass is much higher but that does not harm this mixture.

Character of Kits  
Mixture of 6 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
50 /m<sup>2</sup>

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
12 weeks

Durability  
till 5 years

## 11360 KIT 'FLORA CHANTILLY'©

Begins in a subtle fashion with a pretty little tulip for naturalisation and the adorable little bells of the Leucojum, for example. But to top it all off, the Alliums and Dutch lilies really get the party started.

# 'FLORA FESTIVAL'©

The figurehead of 'Flora Festival' is dominated by many small, delicate flower shapes. Together they form a very natural meadow with weeks of colour.

Character of Kits  
Mixture of 6 types with  
1.000 flower bulbs

Stripes  
no

Contiguous area  
yes

Country style  
50 /m<sup>2</sup>

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
10 weeks

Durability  
till 7 years

## 11357 KIT 'FLORA FESTIVAL'©

This combination is best in green stripes with a not too lush grass growth. The appearance is mainly characterized by some less known flowers bulb plants with for mechanised planting.

# 'FLORA LIVRY-GARGAN'©

You know them - the flower carpets in the summer created with seed. 'Flora Livry-Gargan' creates a similar experience but in the spring. Flourishes from March to July - there's always something!

Character of Kits  
Mixture of 6 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
no

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
12 weeks

Durability  
till 7 years

11381

## 11381 KIT 'FLORA LIVRY-GARGAN'©

This is perhaps not the most advisable mix for Europe's coldest areas, but it is really spectacular thanks to the large number of Dutch irises. Contains a special selection of irises that flower early, at the same time as the Alliums.

# 'FLORA MUSIC'©

From classic spring to lavish floral areas... Or from Mozart to a happy beat... That's how you can describe 'Flora Music'.

Character of Kits  
Mixture of 5 types with  
1.000 flower bulbs

Stripes  
no

Contiguous area  
yes

Country style  
75 /m<sup>2</sup>

Horticulture style  
150 /m<sup>2</sup>

Flowering time  
12 weeks

Durability  
till 5 years

## 11316 KIT 'FLORA MUSIC'©

Spring is characterised by a refreshing mix of narcissi, tulips and wood hyacinths. But when the grass begins to grow and the seed capsules of the small tulips are ready to crack, the second floral feast of Alliums and Gladioli byzantinus bursts forth.

# 'FLORA NATURE'©

'Flora Natura' is characterised by a number of very good perennial bloomers as we encounter these in the Prima kits. But the extension of the season is sensational. Remember to inform your mowing team that they may not urge...

Character of Kits  
Mixture of 3 types with  
1.000 flower bulbs

Stripes  
yes

Contiguous area  
yes

Country style  
50 /m<sup>2</sup>

Horticulture style  
100 /m<sup>2</sup>

Flowering time  
12 weeks

Durability  
till 5 years

## 11317 KIT 'FLORA NATURE'©

The addition of Alliums brings a totally different character to a mix. As a consequence, your patience is momentarily put to the test in the spring, but the effect that comes soon after is all the more striking!
